Profile

Experienced tech professional proficient in both front-end and back-end web development. Skilled in crafting dynamic user interfaces and robust server-side architectures. Expertise includes HTML, CSS, JavaScript, and backend frameworks like Node.js. Passionate about optimizing performance and user experience. Dedicated to staying updated with the latest technologies and industry trends.

Work Experience

May 2023- July 2023
Kenya Power and Lighting Company

Software engineer

As an attachee at KPLC, I gained valuable experience in software maintenance and system design. My role involved assisting in the upkeep of existing software systems and contributing to the design of new ones. During my time there, I had the opportunity to learn the fundamentals of web and mobile application development, enhancing my skills in both domains. Working closely with experienced professionals, I gained insights into industry best practices and methodologies. Overall, my tenure at KPLC provided me with a solid foundation for further growth in the field of software development.
